SPECIFIC COURSE

ECO**DESIGN**

Introduction to Regenerative Design

4H

This workshop is an introduction to regenerative design and development. The regenerative approach focuses on choosing actions that generate positive impacts on natural and social ecosystems. It encourages proactive solutions to environmental challenges by addressing the root causes of contemporary issues.

The content covers key principles and various examples of applications. Through participatory group exercises, participants are invited to reflect on how the regenerative approach can be applied within their own communities.

COURSE STRUCTURE

In-depth knowledge and concepts

Participatory exchanges

Ecodesign strategies and inspiring examples

Integration of ecodesign tools

References and practical information

Practical workshops

This course was developed by Nadine Jaafar and Marianne Lavoie.

TARGET AUDIENCES

- Management teams
- Project managers
- Designers
- Cultural mediators
- Students and teachers

OPTIONS

FORMAT
- In person

LANGUAGE
- French
- English
